My thanks to you, also, Don for putting this together. Also, apologies for not speaking up more during the tech team meeting about pushing harder for an extension and my concerns on it. (Less about my time to review it, but more on our team being able to have one last go around to feel comfortable with the document in a less rushed way before this goes final.) But you got it done, Don, so thanks again.

Yes Don, great job on integrating all of the comments. Huge thanks for taking that on. I've offered a few additional edits on top of everyone else's--most are minor typo things but one is more substantive.

The "Shortfalls" section for small and medium fish streams includes a sentence at the end that reads:

Importantly, unlike the PCW criterion, the CZARA program requirements are not limited to waters currently inhabited by threatened or endangered salmonid fishes, so this deficiency in protecting existing cold water applies to all small and medium fish-bearing streams across the coastal nonpoint management area as well.

Since the actions below call out rule changes to provide greater riparian protection around upstream waters supporting the PCW criterion (not necessarily all of the fish-bearing streams?), I'm wondering if we need a little more flexibility than a blanket statement saying that that protecting cold water must apply to ALL small and medium fish-bearing streams. Would substituting "other" for "all" give us a bit more latitude to accept the approach outlined in the "Actions Needed" section?

Yes my prior comments were addressed, and I am adding a few on top of those from Jayne, particularly to get the landslide language right.

Great job, Don. Although not listed, I suspect you also addressed Jeff Lockwood's comments. Is that true.

See attached for a few minor edits.

Subject: RE: The "Forestry Gaps" Document

All,

Reconciling the various edits of the attached document took up a large part of our meetings on Oregon CZARA today. I hope I did everyone's comments and edits justice. The attached version merges comments/edits from the following people:

- Allison Castellan
- Alan Henning
- Peter Leinenbach
- Scott Hecht
- Me

Ex. 5 - Deliberative

So please take a look. Christine Psyk has emphasized the need for a very fast turn-around on this. Please try to turn your review around by COB if possible or let the group know when you will get to it.

Thanks.

Subject: The "Forestry Gaps" Document

As promised, here are two versions of the latest Draft Internal "Forestry Gaps" documents. One is a clean version with all the revision incorporated and the other is with redline/strikeout and oodles of very long comments, including from me based on input some of you provided. I did make one change today which was to add "Internal Document" and today's date to the header.

So, end of the day Tuesday, 2/10/2015 is the requested deadline for your input. Thanks.
